SUMMARY

Senior Frontend Engineer specializing in React and TypeScript, building internal platforms and scalable UI systems. Known for delivering maintainable frontend architecture and collaborating closely with product, design, and backend engineers to ship complex features. Promoted to Senior Software Engineer after leading multiple core platform initiatives across billing systems, document management, and admin tooling.

EXPERIENCE

Sure — Software Engineer (Nov 2022 – Mar 2025) | Senior Software Engineer (Mar 2025 – Mar 2026)

Tech: React, TypeScript, JavaScript, HTML, CSS, MJML

- Promoted to Senior Software Engineer in recognition of technical execution and leadership contributions.
- Served as the sole frontend engineer on my team for several years where I was responsible for building and improving our internal admin platform.
- Led frontend development for billing configuration tools enabling non-technical operations teams to manage billing workflows as well as improving our document management tools with preview and edit functionality.
- Collaborated closely with product, design, and backend engineers to design APIs, deliver cross-team platform features, and surface UX and technical constraints.
- Facilitated stand-ups, demos, and planning sessions to keep engineering and product stakeholders aligned.

TenantBase — Full Stack Engineer (April 2019 - Nov 2022)

Tech: React, TypeScript, Django, GraphQL, Apollo, Next.js, Storybook

- Led frontend development initiatives on a highly collaborative engineering team, building tenant-, broker-, and admin-facing features for a commercial real estate platform.
- Developed full-stack functionality across the platform using React and Django, working closely with product and business stakeholders to improve features based on user feedback.
- Led migration from REST + Redux to GraphQL + Apollo Client, improving caching, type safety, and frontend data management.
- Converted codebase from JavaScript to TypeScript to reduce bugs and improve developer experience.
- Built and maintained a Storybook component library to ensure UI consistency and reusable design patterns across the application.
- Architected Next.js public listing pages to improve SEO and enable tenants to browse listings without accounts.

SKILLS

React, TypeScript, JavaScript, HTML, CSS, MJML, Python

EDUCATION

University of California, Los Angeles — 2013-2017

Bachelor of Science, Cognitive Science | Specialization in Computing

Grade Point Average: 3.97 | Summa Cum Laude | Phi Beta Kappa | Dean's Honors
